Semibreves and Minims

SEMIBREVES are also called WHOLE NOTES. Trace these six semibreves. Three are on lines and three are in spaces.

MINIMS are also called HALF NOTES. Trace these six minims.

Trace each WHOLE NOTE and copy another one exactly the same right next to it. Make sure the stem goes on the same side as the one you copied.

Draw two semibreves in spaces. Draw a minim in the bottom space and a minim in the top space. Draw two whole notes on lines. Draw two half notes on lines.
CROTCHETS are also called QUARTER NOTES
Crotchets look like minims that are coloured in black.
Trace these notes and turn them into crotchets.

QUAVERS are also called EIGHTH NOTES
Quavers are like crotchets with little tails.
Trace these notes and turn them into quavers.

Quaver stems may go up or down but their tails always turn to the right. Trace these quavers and draw an exact copy right next to each one.
Remember: QUAVERS and EIGHTH NOTES are exactly the same thing. CROTCHETS and QUARTER NOTES are the same thing, too.

Turn these into quarter notes  Turn these into eighth notes  Draw two crotchets in spaces  Draw two quavers on lines
Notes with Flags

Quavers or eighth notes have one flag.
Semiquavers or sixteenth notes have two flags.
Demisemiquavers have three flags.

Trace and colour the semiquavers. Copy one semiquaver.
Trace and colour the demisemiquavers. Copy one demisemiquaver.

<table>

</table>

Trace these notes and draw an exact copy next to each one.

Quavers (one flag) 
Semiquavers (two flags) 
Demisemiquavers (three flags) 

Draw two quavers, one on a line and one in a space.
Draw a semiquaver in a space and one on a line.
Draw a demisemiquaver on a line and one in a space.
Quavers, semiquavers and demisemiquavers can be joined together using BEAMS into groups of two or more notes. Trace these beamed notes and colour them black.

Copy the above beamed quavers, semiquavers and demisemiquavers exactly as they are onto the stave below.

Make a group of three demisemiquavers. Turn this into a group of four semiquavers. Let's make a group of six quavers.
Rests with Flags 🌈🌈🌈

All notes have matching rests. Notes with one, two or three flags have rests with the same number of flags. Trace and colour in the notes with their matching rests. Copy each rest.

Trace two quaver rests and draw two more. Do the same with the semiquaver rests. And the same with the demisemiquaver rests.

Draw a matching rest for each of the following notes.
A semibreve rest looks like a heavy box under the line. Trace and colour in the semibreve rest and copy one more.

A minim rest looks like a light box on top of the line. Trace and colour in the minim rest and copy two more.

A crotchet rest is a bit more difficult. Trace and colour these three crotchet rests.

---

Trace the first crotchet rest. The next four crotchet rests have bits missing. Add the missing parts. Now trace and copy a crotchet rest. And a minim rest.

---

Trace these notes and draw the correct rests next to each one.

Trace one more crotchet rest and copy it.
Sharps, Flats and Naturals

Trace the sharp on the line and the sharp in the space and copy each one twice. Do the same with the flats. And the same with the natural signs.

Sharps, flats and naturals must go on the same line or in the same space as the note that they affect. Trace the partners below and copy them exactly as they are.

Trace the crotchets and draw sharps next to them. Trace the minims and draw flats next to them. Trace the quavers and draw natural signs next to them.

Bass Clef

Trace and colour these BASS CLEFS. Remember to include the DOTS. These bass clefs have bits missing. Complete them and then trace and colour them.

These bass clefs have even more bits missing. Complete them and then trace and colour them.

Now trace a complete bass clef . . . . . . and see if you can draw one of your own . . . Let's try tracing again . . . . . . . . . and draw another one by yourself.
Trace these TREBLE CLEFS. Use bright colours.

These treble clefs have bits missing. Complete them and then trace and colour them.

These treble clefs have even more bits missing. Complete them and then trace and colour them.

Trace a treble clef

Draw a treble clef.

Let's trace again.

Draw a treble clef.

Brace, Bar Lines and Repeat Sign

The BRACE is the line and bracket joining two staves. Trace and colour the BRACE.

BAR LINES divide the music into bars.

REPEAT SIGN tells you to play the music again. Trace the repeat sign.

Copy the BRACE, BAR LINE and REPEAT SIGN here.

Trace the BRACE, BAR LINE and REPEAT SIGN here.

Copy the BRACE, BAR LINE and REPEAT SIGN here.
Other Signs

Two time signatures meaning
4 crotchet beats in each bar

This time signature means
3 crotchet beats in each bar

SLUR or phrase line ....... and a TIE

Double bar lines
(end of section)

Trace the PAUSE
(hold the note longer)

(gradually get louder . . . . and gradually get softer)

Trace all the signs and copy them onto the staff below

Draw a PAUSE here ............. a sign that means three beats in a bar . . . a SLUR . . . . . . . . . . . . . . . . . . . . . a TIE

Extra practice

Trace the Treble Clefs starting at the arrow point. You may trace each one in a different colour.

Complete these Treble Clefs. Make sure that they reach from the top line to the bottom line.
